Flutter

Kotlin

Jetpack Compose

Android

Firebase

Supabase

REST APIs

PROFESSIONAL SUMMARY

Entry-level mobile app developer with experience in Flutter, Kotlin, Jetpack Compose, and cross-platform Android/iOS development. Completed a three-month internship focused on production app features, authentication and OTP flows, analytics integration, backend deployment, and payment workflows. Built projects using Firebase, Supabase, Django, REST APIs, and modern mobile UI practices.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Kotlin, Android Development, Jetpack Compose, MVVM, Navigation Compose

Backend & Databases: Python, Django, REST APIs, Firebase, Supabase, MySQL, PostgreSQL, SQLite, Firestore

Integrations: Firebase Authentication, Supabase Auth, Razorpay Payment Gateway, MSG91 OTP Authentication, Google Analytics, DLT Templates

Tools & Platforms: Git, GitHub, Android Studio, VS Code, Postman, Railway, Cline, GitHub Copilot, OpenAI Codex

INTERNSHIP EXPERIENCE

Cross-Platform Application Developer Intern, Occaza Events Private Limited | Remote | Feb 2026 - Apr 2026

- Maintained Flutter applications for Android and iOS in production codebases.
- Implemented features, fixed bugs, submitted pull requests, and collaborated with senior developers during code reviews.
- Integrated Google Analytics to track engagement, usage patterns, and product behavior.
- Created DLT templates and integrated MSG91 OTP authentication for secure user verification.
- Deployed backend services on Railway and supported API workflows for mobile app features.
- Improved authentication, analytics, and backend workflows for release-ready app updates.

PROJECTS

Rento App - Room Rental Mobile Application | Flutter, Dart, Python, Django, Firebase, Supabase, SQLite, PostgreSQL

- Built a cross-platform rental app that connects room owners and tenants through listings, search, OTP verification, and direct communication.
- Developed REST APIs, authentication flows, payment integration, and cloud-backed components for full-stack mobile functionality.

GitHub: github.com/devSudhanshuX/Rento-App

Quiz App | Kotlin, Jetpack Compose, MVVM, Retrofit, Hilt, Firebase Auth, Firestore

- Created an Android quiz app with login, signup, API-based quiz generation, answer selection, progress tracking, score calculation, and result screens.
- Designed a layered MVVM architecture that supports 24 categories, 1-50 questions, and multiple difficulty levels.

EDUCATION

Senior Secondary (10+2): CBSE Board, Delhi

B.Tech in Computer Science and Engineering: Dr. A.P.J. Abdul Kalam Technical University, ABSS Institute of Technology, Meerut | 2022 - 2026 | CGPA: 7.5+/10

CERTIFICATIONS

Artificial Intelligence Training: Training Basket | Sep 2024 - Oct 2024

Flutter Developer Internship Certificate: Occaza Events Private Limited | Feb 2026 - Apr 2026

ACHIEVEMENTS

- Built and deployed mobile applications with authentication, REST APIs, payment integration, and cloud deployment.
- Earned a permanent role offer from Occaza Events Private Limited after strong internship performance.
- Used GitHub Copilot, OpenAI Codex, and Cline for AI-assisted development and productivity.
